About This Game

An experimental horror game with perma-death, branching narratives, and dynamically adapting terror. A new game from LABS, a one-man studio.

Game Description

Explore and survive on the Dark Shores, a survival horror game that explores concepts of perma-death, branching storylines, and unscripted horror.

A luxury cruise containing five young tourists crashes on a remote island, deep within the South Pacific. As the tourists struggle to survive on the island, they soon realize that keeping themselves fed and sheltered is the least of their worries. There's something else on this island. Hunting them.

Key Features

- **Permanent Death**

In most games, when the player dies, they would respawn at a checkpoint. This however makes death less meaningful, as the player knows that if they get caught, they can just start again. This essentially means that any scary moments lose their appeal instantly. But in Dark Shores, the severe consequences elevate the tension.

- **Branching Narrative**

When the player dies as one character, the story continues as another. This makes for a branching storyline, where the outcome is entirely dependent on who lives, and who dies.

- **Unscripted Fear**

LABS focused on an un-scripted hunter in an attempt to create fear that isn't linear. Once the player becomes aware of the scripted nature planned jump scares, the metaphorical curtain is pulled back, and horror games can lose their impact. To avoid being just a simple haunted house, a level of unpredictability has been added.

English

no keyboard controls remapping, no subtitles, terrible object detalization and textures, invisible walls everywhere - do not buy this game, its trash.. Great premise behind this, just felt it was clunky in it's execution below is my video on it.

<https://youtu.be/VrgIGgbvLRBU>. A good slender-man type game and if a fan of that genre worth a pick up, if they have never been \u201cyour cup of tea\u201d then not enough to add wider appeal in my opinion. Explore an island, uncover story through collectables with added twist of also having to collect items to survive. Multi-line story is achieved due to multiple characters you control but all characters personalities and characteristics are the same not adding much extra depth to gameplay through this dynamic. Game could of done with a slower start maybe explaining features like the map and hiding symbol on screen. But in all for the genre the game exists I feel its a good addition. Being under violent gore I would also call questionable (The game is much better at jump scaring them immersion scares from my experience)
